# O110 Mechanical Arm Support

## The Advantages of the O110: Improving Daily Living

The O110 offers a variety of benefits that make it an ideal solution for individuals with limited upper-body mobility.

- **Compact:** Light, portable, and travel-friendly.
- **Natural Reach:** Restores wide range of motion.
- **Flexible:** Adjustable to user's unique lift requirements.
- **Easy installation:** Easily mounts to tables and wheelchairs.
- **Easy usage:** Manually adjustable to user's needs.
- **Strong:** Supports load of 10.5 lbs.

## A Solution for Various Conditions of Limited Upper Body Mobility

- **Muscular Dystrophy:** Group of inherited diseases that cause muscle weakness and wasting
- **SMA:** Genetic disorder affecting nerve cells, leading to muscle weakness and wasting
- **ALS:** Progressive neurodegenerative disease affecting nerve cells
- **Spinal Cord Injury:** Limited use of upper limbs due to damage to nerves controlling movement and sensation
- **MS:** Chronic disease affecting the central nervous system.
- **Stroke:** Limited use of upper limb due to brain injury
- **Back/Shoulder Pain:** Can limit the use of the upper limbs due to various factors

## A Solution for Limited Upper Body Mobility

The O110 Mechanical Arm Support makes everyday tasks more accessible for people with weak shoulder and arm muscles. It features a progressive compensation mechanism that assists individuals to lift their arms. The O110 helps reduce the effort needed to overcome gravity, allowing users to focus on movement accuracy rather than force exertion. With this arm support, they can enjoy greater autonomy in their daily lives without someone else's help. The O110 is an easy way to regain independence and feel more empowered.

## O110 Mechanical Arm Support: Regaining Independence

Partners in Medicine's Mechanical Arm Support is the latest innovative technology designed to help those with limited arm and shoulder function. This powerful device allows users to perform everyday tasks such as eating, drinking, opening doors/drawers/cabinets, brushing teeth, and combing hair. With its intuitive controls, comfortable design, and cutting-edge technology, the O110 is a must-have for anyone looking to regain their independence and take control of their life.

# About Us

---

Partners in Medicine is a medical device sales company dedicated to providing wheelchair users with the best upper limb mobility devices. We identify leading-edge medical technology made outside of the US and import, market, sell and service these products to clinicians, hospitals, rehabilitation centers, and end-users. We provide our customers with freedom from dependence on others and improved quality of life through mobility solutions. We are committed to helping individuals restore their independence.
